Our Approach

The Lazar Process is based on using "smart" documents that don't just hold information, but rather, facilitate communication.

Our Cloud System allows us to hold on to the knowledge that has flowed through our company for almost two decades, enabling us to provide faster, more accurate, and more affordable translations.

Our Linguists

Lazar maintains a proprietary database with detailed profiles of literally hundreds of translators and interpreters. Our approval process includes cross-checking resumes and references as well as noting any areas of specialization. Lazar also prides itself on providing fully certified translators and interpreters.

Confidentiality

We also comply with client-initiated non-disclosure contracts and privacy agreements. We regularly work with highly confidential material and each person that works for Lazar receives compliance training with confidentiality and non-disclosure laws.
